For integrated shop floors that are flexible, efficient and deliver the productivity gains needed to turn profits, printers rely on xpedx prepress specialists. These G7, JDF and manufacturer-certified experts identify and implement process efficiencies to optimize the performance of a printer's complete prepress production system. Turn to xpedx prepress specialists for consultation and training on everyday applications, RIPs, color management, proofing, server performance, networking, backup and storage, and disaster recovery.

Press

Konica Minolta bizhub Pro C6501

RYOBI 525 GX – 14-1/2" x 20" sheet size, two-up, five-color press with coater

RYOBI 756 – 23-1/2" x 31" sheet size, six-up, six-color press with inline UV casting and foiling

RYOBI 925 – 25" x 35" sheet size, eight up, five-color press with coater

For three decades xpedx has been the exclusive master distributor of Ryobi printing presses in the United States, and added Canada in 2009. A world leader in high-precision large, mid-size and small presses, DI presses and CIP4-JDF compliant digital workflows, Ryobi presses are respected for their superior print quality, cost-effectiveness, ease of operation, high reliability and precision machining.
